And God said:

$$
\begin{aligned}
\oiint \vec{\mathbf{D}}.\mathrm{d}\vec{\mathbf{S}} &= \iiint \varrho.\mathrm{d}V \\
\oint \vec{\mathbf{E}}.\mathrm{d}\vec{\mathbf{l}} &= -\frac{\mathrm{d}}{\mathrm{d}t} \iint \vec{\mathbf{B}}.\mathrm{d}\vec{\mathbf{S}} \\
\oiint \vec{\mathbf{B}}.\mathrm{d}\vec{\mathbf{S}} &= 0 \\
\oint \vec{\mathbf{H}}.\mathrm{d}\vec{\mathbf{l}} &= \iint \Big(\vec{\mathbf{j}} + \frac{\partial \vec{\mathbf{D}}}{\partial t}\Big)\mathrm{d}\vec{\mathbf{S}}
\end{aligned}
$$

. . . and there was light.

Even He had forgotten about the boundary conditions.
